

Bootstrap.

Adding bootstrap

Stop the server and then run
ng add ngx-bootstrap

now go to node_modules → bootstrap → dist → css

copy path of bootstrap.min.css.

one way -

1) Add this to styles.scss

```
@import "~node_modules - - - /bootstrap-min.css"
```

B

second way

2) Go to angular.json

in styles array add the path to bootstrap-min.css along
with node_modules in that path

Bootstrap will make your application responsive
